Sable/Black

Ideal for special shapes

Filtering cover

Filtering: prevents water pockets from forming and protects from dirt. Suitable for heavy rain and recommended for snowy or windy areas.

Perfect tension: its spring-fixing system gives it unbeatable tension quality.

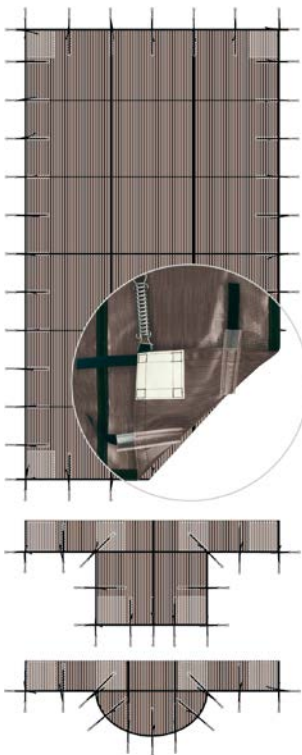

Fastening: with fixing pins.

Strength: the strap grid reinforcements make it very strong.

PVC reinforcement: limits wear and tear and protects the mesh at the inside corners of the stairs and cover.

Protection from rubbing on the coping, thanks to the crystal reinforcements placed along the straps under the cover.

Effortless handling: its low weight per m² is a genuine plus when installing or removing it.

Compliant with standard

NF P 90-308.

Range of application

6.80 x 14.80 m (mesh dimensions).

Fabric

Recyclable polypropylene mesh.

Weight

180 g/m².

Strengths

Breaking point: 30 kN/m (warp) and 20 kN/m (weft).

Treatment

Anti-UV, anti-cryptogamic and antibacterial.

Assembly

Stitching.

Finish

Straps sewn as a grid with crystal reinforcements around the edges and PVC reinforcements in the corners.

Overlap

0.35 m or 0.40 m compared to the water surface depending on the width of the coping. If it is ≥ 0.30 m, then 0.40 m overlap, if < 0.30 m overlap.

Packaging

Delivered in its storage bag.

Every year, 2 million m² are produced in our factories, but each order is unique. Our teams, who have been with us on average for 9 years, have the exceptional know-how which is the key to quality products and services. There can be no successful production without highly qualified and regularly trained staff.
